

ViBe SCALE:

Grado	Presentación visual	Apariencia anatómica	Descripción cualitativa	Estimado visual de la tasa de pérdida de sangre (mL / min)
0	 Sin sangrado	 Sin sangrado	Sin sangrado	≤ 1.0
1	 Leve / Flujo intermitente	 Sangrado como goteo	Leve	$< 1.0 - 5.0$
2	 Flujo continuo	 Sangrado venular o arteriolar	Moderado	$> 5.0 - 10.0$
3	 Flujo no controlable / Flujo abrumador	 Sangrado venoso y arterial no central	Severo	$> 10.0 - 50.0$
4	 No identificado / Inaccesible Chorro o Torrente	 Sangrado arterial y venoso central	Amenaza de vida	> 50.0

ViBe SCALE:

Escala de Sangrado
Intraoperatorio Validada.

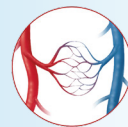

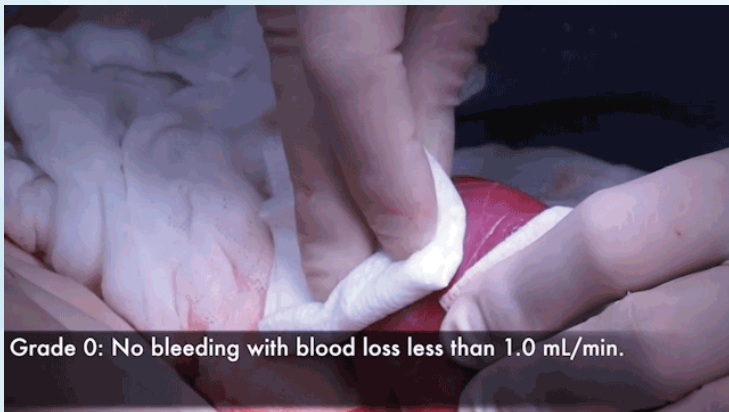

En Baxter estamos preparados para controlar el sangrado en todas las etapas, para eso diseñamos la escala de sangrado intraoperatorio validada **ViBe SCALE**, la primera escala diseñada por cirujanos para ser una herramienta consistente y objetiva en la evaluación de la severidad del sangrado intraoperatorio.

Baxter

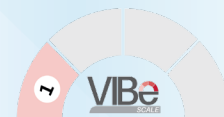

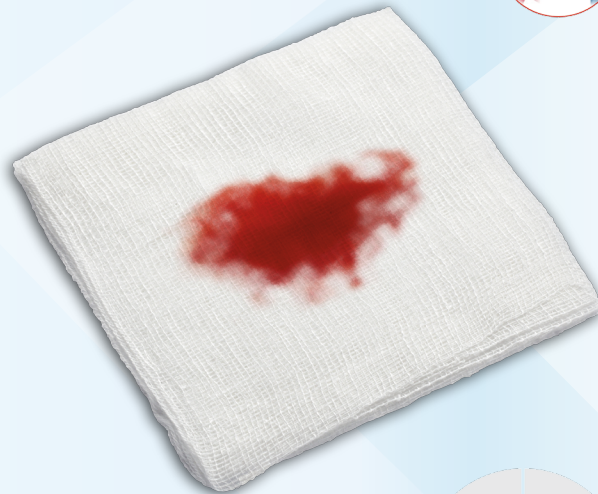

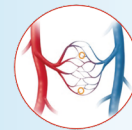

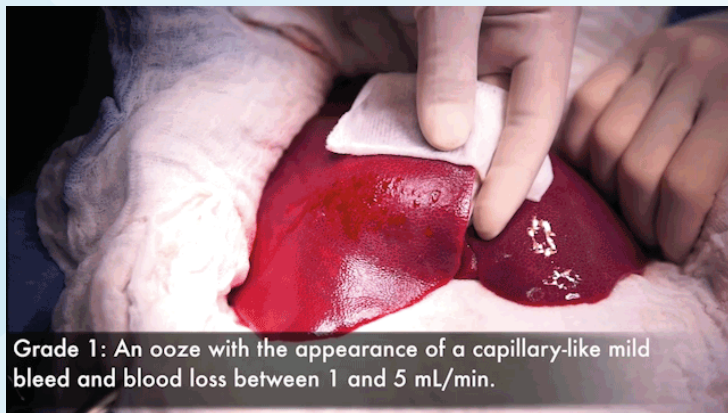

ViBe SCALE:

Escala de Sangrado 0

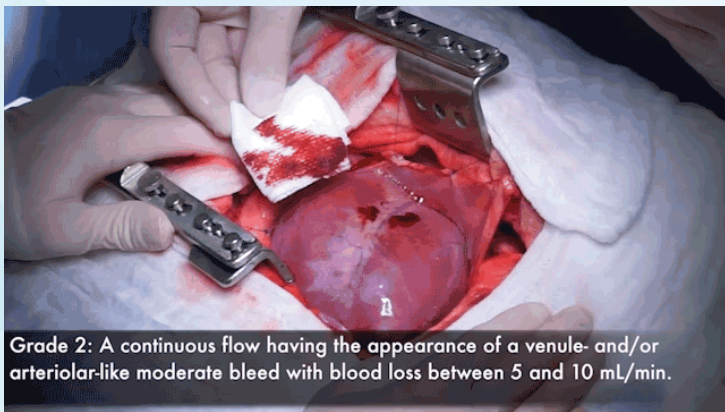

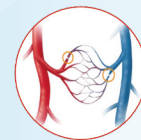

ViBe SCALE:

Escala de Sangrado 1

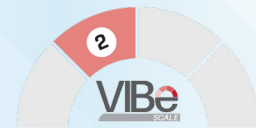

ViBe SCALE:

Escala de Sangrado 2

Grade 2: A continuous flow having the appearance of a venule- and/or arteriolar-like moderate bleed with blood loss between 5 and 10 mL/min.

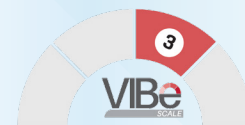

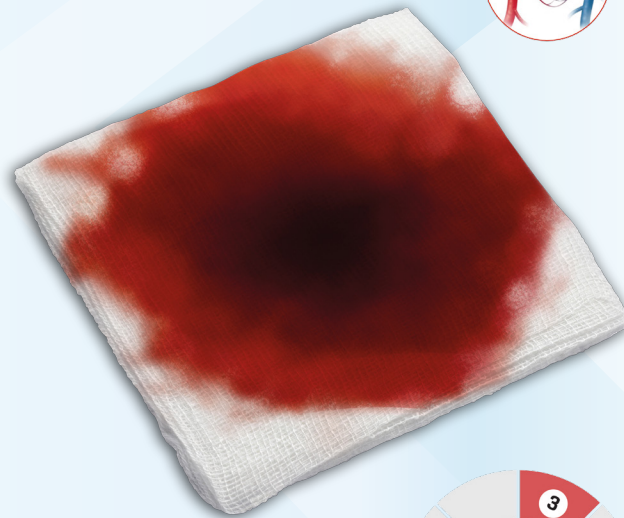

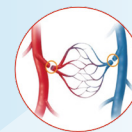

ViBe SCALE:

Escala de Sangrado 3

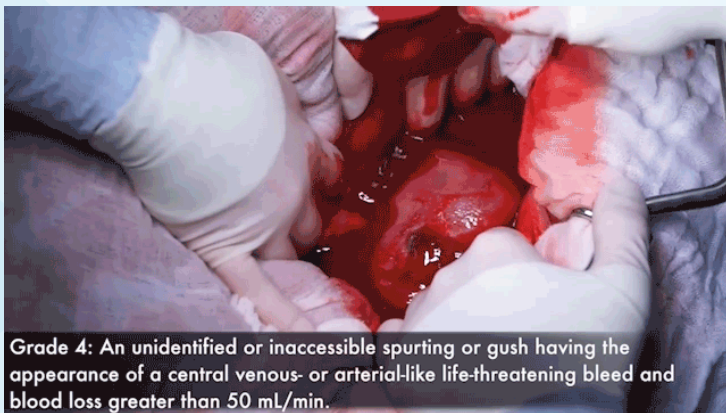

Grade 3: A controllable spurting or overwhelming flow having the appearance of a noncentral venous- or arterial-like severe bleed and blood loss between 10 and 50 mL/min.

ViBe SCALE:

Escala de Sangrado 4

Grade 4: An unidentified or inaccessible spurting or gush having the appearance of a central venous- or arterial-like life-threatening bleed and blood loss greater than 50 mL/min.
